## Online Library

Evidensia's library hosts all the evidence, information and insights we share on the site. Our robust search engine helps you find the right content in your choice of format.

For more information on the methodology and type of evidence included on Evidensia, visit the [Evidensia Approach and Methodology](#) page, and scroll down to the Online Library section.

The screenshot shows the Evidensia Online Library search interface. On the left is a 'Filter results' sidebar with categories: Approaches & Tools, Issues & Outcomes, Sectors & Products, Regions & Countries, and SDG Focus. The main search area includes a search bar with the placeholder 'E.g sustainability issue, SDG, program, organisation...', a 'Search' button, and '268 results' with a 'Download search results' link. Below the search bar, it says 'Showing all research - Use filters or type a search to refine results'. There are dropdown menus for 'Sort:' (set to 'Publication date (newest first)') and 'Format:' (set to 'All Formats'). A featured result is shown: 'What Works? We Need To Know', a 'Briefing or opinion' published on '11th June 2019'. Another result is partially visible: 'Effects of voluntary sustainability standards on yield, price, costs and income in the agriculture sector', which is a 'Research report'.
